

Long Bio (word count 124)

Wendy is an AWS Data Hero, a Data Scientist, Business Analyst and AWS Certified Solutions Architect Associate who leverages her cloud and data expertise to solve business problems with complex analytics at scale in cloud architecture, ETL modernization, AI/ML, and NLP.

Besides her technical skills, Wendy is passionate about teaching, mentoring, and sharing knowledge and experience with the data community as a Lead Instructor in Data Analytics at General Assembly Australia, Lecturer at Kaplan Business School and as an Instructor at LinkedIn Learning.

Wendy's mission is to empower and inspire others to learn, grow, and innovate with data, generative AI, machine learning, business and cloud.

She is passionate about community and previously led Women in Data Science Sydney and Women in Big Data Sydney.

Short Bio (word count 62)

Welcome to the AWS PeerTalk Experts platform! It's easy to get started. Simply download the AWS Events mobile app and select the PeerTalk from the main menu.

I look forward to meeting you and connecting over data engineering, machine learning, generative AI and analytics. I would love to hear your thoughts about the keynotes and breakout sessions. See you in Las Vegas!
